

THE CAPTURE: BOTH REFERENTS VISIBLE

THE TWO REFERENTS, AS DELIVERED

obj_1 (left): the basket. Bridge resolved it: **correct**.

obj_14 (right): the desk. Bridge **abstained**: no entity won two view slots.

ONE QUESTION, PER-ARM OUTCOMES

stored relations, human identity **NOT DEPLOYABLE** — **correct**

delivered graph, learned labels — **could not answer** — no delivered instance carries an admitted label for this object

grounded graph, CLIP bridge — **could not answer** — the grounding bridge abstained on this anchor

direct multiview RGB — **correct**

Stored edge obj_1 ↔ obj_14: surface distance **0.0 m** < 1.0 m: the serialized **NEAR** edge matches recomputed geometry under the same convention.
